

Database Analyst (f/m/d)

Employment: Full time
Start: As soon as possible

Your mission

As a database analyst, you will be responsible for monitoring, evaluating and maintaining our databases to ensure maximum throughput. You provide database support and implement solutions that enable our platforms to be high-performing.

Your focus

- Database administration, including analysing and modifying the structure based on best practices
- Monitor, test and report database performance
- Work together with the development team and Data/ETL Engineer to identify data storage needs and adaptations

Why you

- Experience in structuring, modelling and remodelling databases
- Skilled with live databases, analysis tools, and MySQL
- Knowledge of best practices for database backup and operational concerns

Diversity at Bitpanda

At Bitpanda, we strongly believe in the benefits of having a diverse team. Varied experiences, perspectives and backgrounds lead to a better workplace and eventually to better products for our users. Thus, we actively foster diversity at Bitpanda. We believe in equal opportunities for everyone, no matter the nationality, skin colour, gender, religion, sexual orientation, age, seniority level, marital status, or disability status.

Why us

At Bitpanda we are firm believers in the innovative power of cryptocurrencies, digitised assets and blockchain technology. As a result, Bitpanda has grown into a popular trading platform for newbies and experts alike.

Benefits

- Flexible working hours
- Latest hardware
- Lunch and gym discounts
- Buddy program
- Regular team events and a yearly team trip
- Brand new office (w/ rooftop) in the Viennese FinTech Hub
- German classes

Note: Bitpanda offers an ensured salary according to the collective agreement and a possible overpayment depending on the qualifications.

Are you ready for this exciting ride into the future with us?

Then we look forward to receiving your detailed application. You can apply at www.bitpanda.com/career
